2. **Communication with the Audience** -Tamara Bojarski thanked the board for all that they do, respectfully requested that the board reconsider the wages for paraprofessionals.
3. **Report on Math Curriculum—Karen Abbey**
  - Karen Abbey reported on the following topics relating to the math department:
  - Elimination of the 7<sup>th</sup> grade honors course, in order to level the playing field so that all students are able to start out in the same course. This has increased confidence in the students and increased the number of students that choose to take the honors 8<sup>th</sup> grade math course. These 8<sup>th</sup> graders then take one semester of standard 8<sup>th</sup> grade math and one semester of honors. This helps students to be prepared for the SBAC test.
  - 8<sup>th</sup> graders also participate in one quarter rotation of computer science
  - Highschool Students have several math classes to choose from, one of our newest options for our students is a class that involves one semester of algebra 2, and one semester of intro to statistics. This prepares students for the SAT, as well as AP Statistics should they choose to take it.
  - Clubs include Math Modeling Club (using Statistics and Calculus) and Cyberstart America, introduces students to cyber security and students are able to compete on a national level to move up on the leaderboards.
  - Project STEM gives our school curriculum 7-12 as well as speakers and virtual fieldtrips relating to computer sciences, with hands-on real-world examples.
  - Aspirations and Computing gives scholarships for computer science training.
  - AP Computer Science class is growing, last year all students got a 4 or 5.
  - All students passed AP Calculus and AP Statistics exams.
